Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is a Final Office Action in regard to the amendment filed on March 09, 2004.
2. Claims 1-19 are presented for examination following the amendment, of which Claims 1, 9, 13 and 17 are Independent.
3. The Examiner acknowledges the new added claims 18-19.

Priority

4. Applicant's claim for foreign priority under 35 U.S.C. §119(a)–(d) is acknowledged, the Applicant was accorded the benefit of the earlier filing date of November 10, 1999.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-19, are rejected under 35 U.S.C. 102(e) as being anticipated by Bryan I-chuen Lee (U.S. Patent No. 6,212,553 and Lee hereinafter).

Art Unit: 2171

Regarding Claim 1, Lee discloses an information history list display section for displaying communication history¹ (Figure 14, 35 and 36 and corresponding text) in connection with answering state of the respective communication (Figure 36, Elements 3620 and 3610 and corresponding text; see also Figure 14, i.e. status; see also Col 5, Lines 49-56) based on history related information² (Figures 35 and 36 and corresponding text)³ which is generated by outgoing or incoming communication (Figures 35 [outgoing] and 36 [incoming] and corresponding text) and indicates the answering state of the respective communication (Figure 36, Elements 3620 and 3610 and corresponding text; see also Figure 14, i.e. status; see also Col 5, Lines 49-56).

Regarding Claim 2, Lee discloses

a history management section for recording the communication history (Col 8, Lines 60-64);

and an information management table for recording the history related information (status) that indicates the answering state of the respective communication stored in said history management section (Col 5, Lines 57-64; see also Col 23, Lines 16-37).

¹ Please note that the Examiner is interpreting the "communication history" to be the same as an "e-mail message". This is according to the Specification of the current application (see page 1, Lines 15-17).

² Please note that the Examiner is interpreting the "history related information" to be the same as a "status" of n e-mail.

³ The "history related information" would be the e-mails that were sent out the first time to inquire about the Christmas Party.

Regarding Claim 3, Lee discloses wherein said information management table records relationships between the respective communication (e-mail) and said information history list display section (Col 5, Lines 57-64; see also Figure 14 and associated text).

Regarding Claim 4, Lee discloses plurality of different communication means (Figure 1, Element 12 and 13; see also Col 13, Line 49).

Regarding Claim 5, a personal address book for recording a personal name of a communication party (Figure 3, Element 335; see also Col 13, Line 52) and a communication address of the communication party (Col 13, Line 52); and an address book search section for searching said personal address book (Col 17, Lines 24-39) wherein said information history list display section displays the personal name in substitution for the communication address included in the history information stored in said history management section in accordance with a retrieval result from said personal address book by said address book search section (Figure 14 and corresponding text, i.e. the names of the names of the senders under the "From" column displays the personal name, such as, "Bob Winters" in substitution for the communication address (e-mail address)).

Regarding Claim 6, Lee discloses wherein the communication history (e-mails) and the history related information (status) are stored in a server (Col 9, Lines 8-10).

Regarding Claims 7 and 8, the limitations of these claims are similar in scope to the rejected claims 2 and 6, above. They are therefore rejected as set forth above.

Regarding Claim 9, the limitations of this claim are similar in scope to the rejected claim 1, above. In addition, Lee discloses a server comprising: a personal information management section (address book with personal info) for transmitting, in response to a request, information to said information terminal (Col 17, Lines 24-38).

Regarding Claims 10-12, the limitations of these claims have been noted in the rejection of claim 9, above. In addition, Lee discloses:

- a history management section for recording communication history (Col 8, Lines 60-64); and

- an information management table for recording history related information which indicates the answering state of the respective communication stored in said history management section (Col 5, Lines 57-64; see also Col 23, Lines 16-37).

Regarding Claims 13-16, the limitations of this claim has been noted in the rejection of claims 1, 2 and 3, above.

Regarding Claim 17, Lee discloses:

- recording communication of respective communication (Col 8, Lines 60-64)

- recording history related information and indicates an answering state of the respective communication (Col 5, Lines 57-64; see also Col 23, Lines 16-37)

- and displaying the respective communication in connection with the answering state of the respective communication based on the history related information (Figure 14, i.e. status; see also Col 5, Lines 49-56).

Regarding Claims 18-19, the limitations of these claims are similar in scope to the rejected claims 1-3, above. They are therefore rejected as set forth above.

Response to Arguments

7. Applicant's arguments filed in the amendment of March 09, 2004 have been fully considered but they are not persuasive.

Applicant argues that Lee does not teach information history list display section for displaying communication history in connection with answering state of the respective communication based on history related information which is generated by outgoing or incoming communication and indicates the answering state of the respective communication. The Examiner however disagree. Lee's reference does teach the limitations of information history list display section for displaying communication history in connection with answering state of the respective communication based on history related information which is generated by outgoing or incoming communication and indicates the answering state of the respective communication (please refer to the rejection of Claim 1 above and the newly cited areas of Lee's reference).

Other Prior Art Made of Record

8. a. Murakami et al. (U.S. Patent No. 5590178) discloses an electronic mail system linked with telephone; and

b. Grossman et al. (U.S. Patent No. 5436965) discloses a method and system for optimization of telephone contact campaigns.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
